

■ Supply air nozzle VŠ-5

Application

Air supply nozzles VŠ-5 are applied in the supply of cold or warm air in rooms where long throw distances and low noise operation are required. By combining individual nozzles into a block, the throw distance is increased proportionally. There is a choice of several mounting methods.

Description

Supply nozzles VŠ-5 are adjustable. The air jet can be adjusted:

- manually, in all directions, within a $\pm 30^\circ$ range
- by means of an electric motor or thermostat element, in horizontal and vertical direction, within a $\pm 30^\circ$ range.

The nozzle setting depends on the supplied air temperature.

The supply nozzle is integrated in a housing, thus even with the largest size, 400, it does not project into the room by more than 45 mm (see dimension L2 as a function of the setting angle 0°).

Supply nozzles VŠ-5 are made of galvanised eloxal treated aluminium sheet. On customer's request, nozzles can be powder painted in any of the RAL scale colours.

Mounting methods:

• Standalone nozzle (V)

A nozzle without extensions is mounted by means of three bolts from its face. The mounting opening dimension is $\phi D_o + 10\text{mm}$.

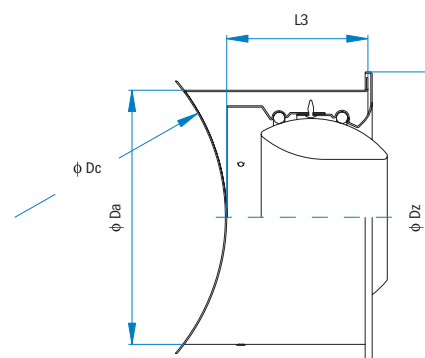

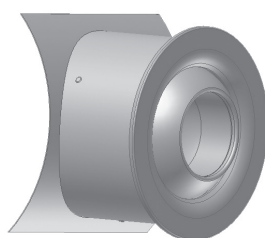

• Mounting with extensions (designations D,K,E)

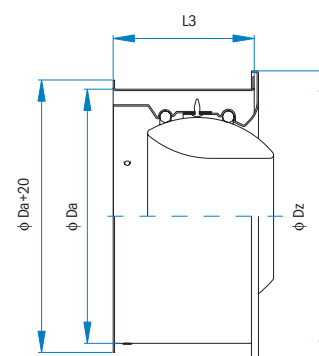

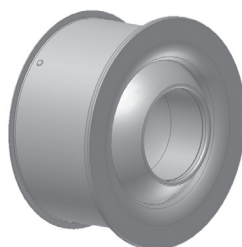

Visible nozzle mounting by means of an extension. The nozzle is supplied with the extension already installed. The installation technician mounts the extension to a round or rectangular duct by means of rivets or self-tapping screws. On customer's request, the extension can be powder painted in any of the RAL scale colours. The duct diameter ϕD_c shall be specified in the order.

The extension is mounted separately. A standard dimension duct is attached to the extension connector.

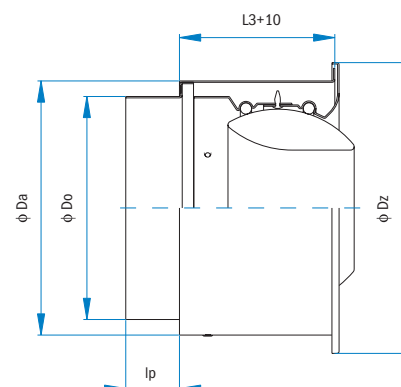

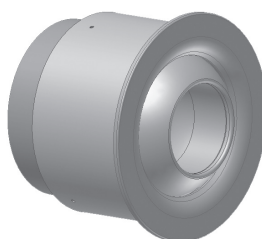

Mounting to a round duct (D)

Mounting to a rectangular duct (K)

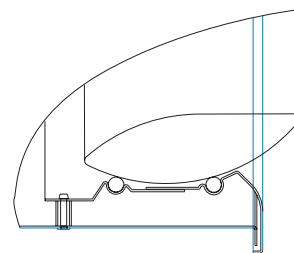

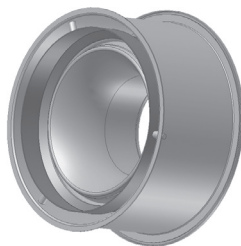

Mounting with a connector to a duct (E)

• **Mounting of a nozzle on the extension**

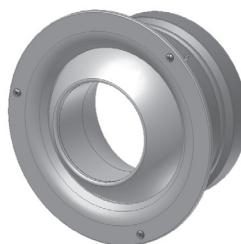

The nozzle is fixed into the extension on the side face, thus there are no bolts on its face side.

Size	ΦDo	ΦDz	ΦDa	ΦDa+20	L3	ΦDc min	lp
100	98	146	118	138	90	125	63

B5 motor Belimo NM 230A

B6 motor Belimo NM 24A SR

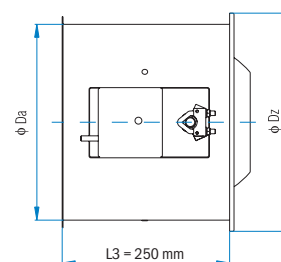

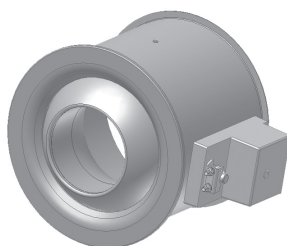

J4 motor Joventa DAS 1

J5 motor Joventa DAS 2

J6 motor Joventa DMS 1.1

Variants D, K and E available.

With all the variants, the L3 dimension equals 250 mm.

Adjustment methods:

- **Electric motor adjustment, internal drive**

B1 LH motor Belimo LH 24A 100

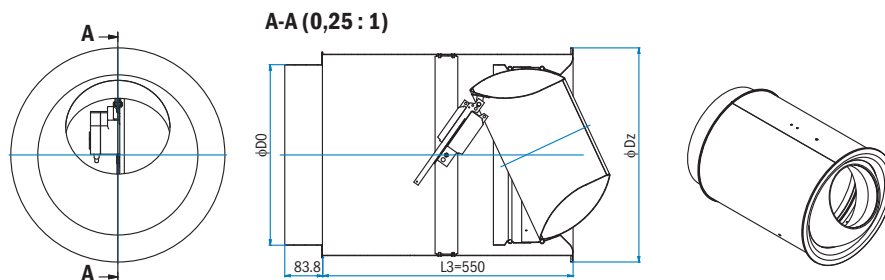

B2 LH motor Belimo LH 230A 100

B3 LH motor Belimo LH 24A SR

B4 LH motor Belimo LH 24A MP100

Variants D, K and E available.

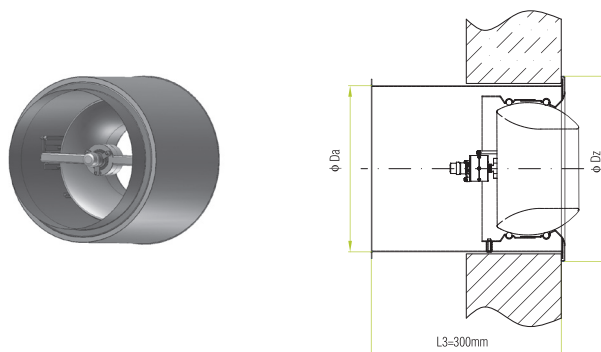

With all the variants, the L3 dimension equals 550 mm. Variant is available in following sizes: 160, 200, 250, 315 and 400.

- **Thermostatic regulation**

Available designs: D, K or E.

The dimension L3 is 300 mm and is the same for all sizes. The designs are compatible with the sizes 200, 250, 315 and 400.

**Advantages**

- Automatic regulation using a thermostatic head
- Requires no motor or installation required for motor power supply and control
